PREFACE

The trade data included in the **1996 U.S. Merchandise Trade with Developing Countries** were compiled from the Trade Policy Staff Committee (TSPC) Tradenet housed at the National Institute of Health (NIH). The TSPC Tradenet is an on-line database system that allows users to access a variety of economic databases. One of the databases available through Tradenet is the Department of Commerce, Bureau of the Census Merchandise Trade Database which includes United States historical trade data, current up to 48 days prior to the present date. The trade data can be retrieved using the Standard International Trade Classification (SITC), Revision III Codes (1-5 digit level) or Harmonized System Codes (2, 4, 6, 8 and 10 digit levels). The Bureau of the Census data is widely considered to be the most reliable and extensive source for U.S. merchandise trade data. The data included in this document were retrieved from the Bureau of Census Merchandise Trade Database using SITC, Revision III, imports for consumption (customs value) and total exports (f.a.s.) data. The data were downloaded electronically for the years 1985 and 1990 through 1995.

The Highlights section provides a brief overview of U.S. merchandise trade levels and trends for global and regional trade. Leading trade partners and commodities are highlighted for each of the developing country regions. A special section on U.S. trade in computer and telecommunications equipment has been added to this 1996 edition.

Section I of this document summarizes United States trade with the world, OECD countries, developing countries, sub-Saharan Africa, Asia and the Near East, Eastern Europe and the New Independent States (NIS), and Latin America and the Caribbean. For each region there are summary tables of exports, imports and the trade balance and graphs displaying trends and trade composition, as well as charts showing the top 20 U.S. export and imports markets.

Sections 2 through 6 include detail trade trends for each region, sub-region and respective countries and include both total imports and total exports. Each region includes export and import data for total trade, primary products, manufactured goods, and capital and consumer goods (a subset of manufactured goods). U.S. trade in apparel and computer/telecommunications equipment are also detailed as specific consumer commodity groupings. Growth rates are provided for "1985 to 1995" and "1994 to 1995".

The appendix contains the methodology followed in the preparation of this document and a list of Standard International Trade Classification, Revision III codes at the 1 and 2 digit levels.

Information on OECD countries is included as a point of comparison for the volume and growth in trade between the U.S. and developing countries. Austria, Sweden, and Finland became new members to the European Union in 1995 and are included in this sub-region on the OECD tables. For this report, OECD totals in the summary section do not include Mexico, which is included in the Latin American totals. OECD totals, with Mexico included, are shown in the detail tables in section 6. The Czech Republic and Hungary joined the OECD in 1995 and 1996, respectively. They are not considered in OECD in this report, which covers trade data up through 1995.

Note: this document analyzes merchandise trade only and not trade in services. In general, the tables for merchandise trade will indicate a net trade deficit for world total and for each region contained in this analysis. In contrast, U.S. trade in services generally show consistent trade surpluses.

This publication has benefited from contributions by various USAID staff and consultants. In particular, we would like to acknowledge David Schuler and Joe Nassif for their efforts in past years in making this an annual production. Thanks also go to Phil Church, Heather Crawford, and Ramsay Teviotdale for invaluable editorial and production assistance and to George Gerhold of the Department of Commerce International Trade Administration for assistance in the data compilation.

HIGHLIGHTS

U.S. MERCHANDISE TRADE WITH DEVELOPING COUNTRIES 1985-1995 billions of US dollars

* Developing Countries total is aggregate of four regions shown above.

U.S. MERCHANDISE TRADE TRENDS

Trends in 1995

Two major trends in U.S. trade with developing countries are evident in the data:

- ◆ **Rapid U.S. export growth to Developing Countries continues.** U.S. exports to developing countries rose by 13% in 1995, continuing the rapid growth of recent years. For the first time in four years, however, U.S. exports to developing countries grew at a slower pace (13.5%) than those to OECD countries (13.6%). Asia was the fastest-growing market for U.S. products, with exports increasing by 26% in 1995. Exports to Africa also grew by 22%. Latin America's noted increase in 1994 (up 18% from 1993) declined to only 3% in 1995. U.S. imports from developing countries also grew rapidly during 1995, particularly for manufactured products, widening the U.S. trade deficit by \$16 billion. There was a major decrease in the growth rate of imports from Eastern Europe and the New Independent Countries, dropping to 19.5% in 1995 from over 50% in 1993 and 1994. The trade deficit with OECD countries narrowed by \$4 billion.
- ◆ **Capital goods are the leading U.S. exports to developing countries.** For each of the four developing country regions, capital goods and scientific instruments are at least eight out of the ten largest categories of U.S. exports. Electrical machinery and aircraft are the two leading products.

Trends Since 1985

- ◆ **U.S. exports to developing countries grew much faster** than exports to developed countries -- a 217% increase vs. 147%, respectively. Since 1985 exports to developing countries increased from 35% of total exports to 42% in 1995. The shape of U.S. exports to these emerging markets has shifted increasingly toward manufactured products, particularly capital goods. In 1995, capital goods accounted for 58% of all U.S. exports to developing countries, up from 50% in 1985. Developing countries have become a larger market than the OECD for several capital goods categories, including telecommunications equipment, electrical machinery and aircraft (both civilian and military).
- ◆ **Asia (not including the Near East) and Latin America are the emerging markets for U.S. products.** These two regions accounted for 86% of U.S. exports to developing countries in 1995, up from 76% in 1985. Markets for U.S. products have been less dynamic in Eastern Europe and the former Soviet Union, the Middle East and Africa.
- ◆ **Imports to the U.S. also increased significantly since 1985.** Total imports more than doubled from \$344 billion to \$740 billion. As with exports, manufactured goods imported by the U.S. increased from 71% to 81% of total imports, while primary products fell to 15% of imports in 1995. This shift from primary products to manufactured goods—mostly capital and consumer goods, was more apparent in the developing region where the annual growth rate for the decade was 14% compared to 7% for OECD member countries.

U.S. MERCHANDISE TRADE COMPUTER AND TELECOMMUNICATIONS EQUIPMENT

- ◆ U.S. trade in computer and telecommunications (comptel) equipment has grown steadily in the last decade. Since 1985 exports have increased 12% and imports have increased 13%, resulting in a growing trade deficit reaching 55% of total equipment exports in 1995. The trade category for comptel equipment consists of commodities reported under SITC 75 and 76 (level 3). It includes digital computers, copiers, televisions, radios, and telephone sets and switching equipment (*see table below*).
- ◆ The majority of U.S. exports of comptel equipment, 61%, have been to industrialized, OECD, countries. The balance of this trade has gone primarily to Latin America and the ANE regions.
- ◆ U.S. Imports of comptel equipment has increasingly come from developing countries. Between 1985 and 1995 imports of comptel equipment from developing countries increased from 30% to 59%, primarily from the new Asian economies. Imports from Latin America are almost exclusively from Mexico (96% in 1995), more than double the 1990 level. Comptel equipment Imports from Sub-Saharan Africa are from Cote d'Ivoire (photocopiers) and Mauritius (computer parts, digital storage units). Imports from the ENI region originate in Hungary (televisions) and Poland (telecommunication equipment parts and accessories).
- ◆ The table opposite shows the percent of world trade for the top developing countries engaged in trade of these commodities for aggregated trade during the 1990's. Imports from China and Malaysia have increased almost 500% since 1990. Growing export markets in Latin America, particularly Mexico, Brazil, and Argentina are also evident.

U.S. REGIONAL TRADE TRENDS IN 1995 SUB-SAHARAN AFRICA

- ◆ U.S. trade with Sub-Saharan Africa is small compared with Asia and Latin America, and in 1995 accounted for only 2% of total U.S. exports to the developing world and 4% of U.S. imports from the developing world.
- ◆ U.S. exports to Sub-Saharan Africa boomed in 1995, rising by 22% to \$5.4 billion, following several years of stagnation. Exports to South Africa, the largest market, led the way, rising by 27% to \$2.7 billion, providing over half of the regional increase from 1994 (*see table*). Exports to Nigeria, the second-largest buyer, also recovered somewhat from the depressed level of the previous year. Over half of U.S. exports to the region consist of consumer and capital goods, particularly specialized and industrial machinery, and transport and motor vehicles.
- ◆ U.S. imports from the region rose by 7.4% in 1995, to \$12.9 billion. The U.S. trade deficit with the region also fell marginally from 1994. Oil and petroleum products account for nearly 70% of the value of all U.S. imports from Africa. The U.S. imported 17% of its petroleum products from the region, over half of which comes from Nigeria (*see table*). Manufactured goods constitute about 20% of U.S. imports from Africa, while representing the bulk of U.S. exports to the region.

U.S. REGIONAL TRADE TRENDS IN 1995 ASIA AND THE NEAR EAST

- ◆ Asia continues to be a highly dynamic market for U.S. exports. U.S. exports rose by 26% to \$115 billion in 1995, compared to \$92 billion in 1994 and \$31 billion in 1985. Among major markets, countries with rapid growth rates for U.S. exports in 1995 were South Korea (up 41%), the Philippines (up 36%), Thailand (up 32%), Malaysia (up 27%), China (up 26%), and Hong Kong (up 24%). Except for the Philippines, each of these countries represents a market for U.S. exports larger than all of Sub-Saharan Africa or of Eastern Europe and the NIS. Since 1990 exports to and imports from the leading Asian economies have nearly doubled (*see table*) and comprise over three-fourths of U.S. trade to the entire ANE region.

- ◆ U.S. imports from Asia continued to grow at double-digit rates in 1994, and the U.S. trade deficit with the region widened to \$66 billion. As in 1993 and 1994, the trade deficit with the four NICs narrowed to \$7.4 billion, but that with China continued to widen, reaching \$34 billion. Since 1985, U.S. imports from China have ballooned from less than \$4 billion to more than \$45 billion, while U.S. exports to China grew from \$4 billion to \$12 billion.

- ◆ U.S. exports to the Near East grew by a modest 5.4%, to \$22.1 billion, after stagnating for the three previous years. Increases in exports to Israel (up 12% to \$5.6 billion) and Kuwait (up 21% to \$1.4 billion) were offset by sharp declines in exports to Algeria, Bahrain, and Tunisia and stagnation elsewhere. Iraq was the sixth largest U.S. trading partner in the Near East in 1985; however, trade sanctions have caused trade with Iraq to virtually end. U.S. imports from the region increased marginally to \$18.9 billion. The U.S. trade surplus with the Near East rose slightly, to \$3.2 billion.

U.S. REGIONAL TRADE TRENDS IN 1995 EASTERN EUROPE AND NEW INDEPENDENT STATES

- ◆ Although the smallest U.S. trade region (2% of all developing countries), U.S. exports to Eastern Europe and the Newly Independent States rose by 7.3% in 1995. This turnaround in exports follows a 1994 decline of 11.5% in 1994. Russia and Poland, the two largest markets, were buoyant, as were the Czech Republic and Slovakia (*see table*). Capital equipment and agricultural products (primarily meat and cereal) continue to be the dominant exports to Eastern Europe and the NIS. Exports of primary products to ENI countries showed the first increase since 1989. Manufactured goods exports remained stagnant, up only 3% compared to the higher growth rates reported in the early 1990's.

- ◆ After stagnating between 1985 and 1992, U.S. imports from both Eastern Europe and the New Independent States rose sharply for the third year a row. Imports were up 19.5%. This led to a an increase in the recent trade deficit with the ENI region to \$1.5 billion. Russia is the major regional exporter, accounting for over half of all the region's exports to the United States. Nonferrous metals and iron and steel were the leading categories of U.S. imports from Russia.

U.S. REGIONAL TRADE TRENDS IN 1995 LATIN AMERICA AND THE CARIBBEAN

- ◆ U.S. exports to Latin America and the Caribbean rose only 3% in 1995, to \$95.4 billion. Exports of capital goods actually declined from 1994. This is due entirely to an 11% decline in exports to Mexico, due to the economic crisis that unfolded in January 1995. Mexico's dominance in U.S. trade with Latin America is detailed below (*see table*). For the rest of the region, U.S. exports rose by 20%, to \$50 billion. Capital goods, including electrical equipment, motor vehicles, office machines, telecommunications equipment and aircraft, continue to be the leading U.S. export sectors.

- ◆ U.S. imports from the region continued their rapid climb, growing by 19.8% to \$103.4 billion. Manufactured goods were particularly buoyant. The United States slipped into a trade deficit with the region for the first time since 1990. Again, Mexico was the major factor. The U.S. trade surplus with the rest of the region rose from \$4 billion in 1994 to \$8 billion in 1995, while the trade balance with Mexico changed from a surplus of \$2 billion to a deficit of \$16 billion..

- ◆ The economic turnaround in Latin America and the Caribbean has fostered rapid growth of two-way trade since the mid-1980s. U.S. exports to the region more than tripled from \$31 billion in 1985 to \$95 billion in 1995, while U.S. imports more than doubled, rising from \$46 billion to \$103 billion. Particularly dynamic markets -- where U.S. export sales more than quadrupled -- were Argentina, Chile, Paraguay, Uruguay, Costa Rica, Guatemala, Honduras and the Dominican Republic.

APPENDIX

METHODOLOGY

TABLE DESCRIPTIONS

Section 1 contains summary graphs and tables of U.S. bilateral trade with the world, OECD countries, developing countries, Sub-Saharan Africa, Asia and the Near East, Latin America and the Caribbean, and Eastern Europe and the New Independent States. For this edition, Mexico is included in both Latin America and in the OECD totals. These tables and graphs detail summary trade trends for the following categories:

Total	(All Commodities, SITC 0-9)
Primary Products	(SITC 0-4)
Manufactured Goods	(SITC 5-8)
Other Goods	(SITC 9)

Twelve descriptive tables for each of the regions are included in Sections 2 through 6, including six exports and six import tables for the following categories:

Total	(All Commodities, SITC 0-9)
Primary Products	(SITC 0-4)
Manufactured Goods	(SITC 5-8)
Capital and Consumer Goods	(SITC 7 and 8)
Apparel	(SITC 84)
Computer and Telecom Equip.	(SITC 75 and 76)

Definitions for these categories can be found in the Appendix. The "Total" export and import categories are simply the sum of all merchandise classifications (Standard International Trade Classification codes 0 through 9). For a more detailed look at SITC codes and their definitions, see the same Appendix section. Also listed are the countries for each region and subregion. These classifications are generally based on United States Agency for International Development (USAID) groupings.

GROWTH RATE FORMULAS

Growth rates for all tables were calculated using Formulas 1 and 2. Formula 1 is a geometric mean statistical equation, based on end-points, and was used to calculate the annualized growth rate for 1985 to 1995. Formula 2 was used to calculate the growth rate for 1994 to 1995.

Formula 1

$$(1995/1985)^{1/10} - 1] \times 100 = \text{Annual Growth rate for 1985 to 1995}$$

Formula 2

$$(1995-1994)/1994] \times 100 = \text{Annual Growth rate for 1995}$$

COUNTRIES INCLUDED IN TABLES, BY REGION AND SUBREGION

SUB-SAHARAN AFRICA	LATIN AMERICA & THE CARIBBEAN	ASIA & NEAR EAST	EAST EUROPE & NIS
Central and Coastal West Africa	Caribbean	Asia and Oceania	Eastern Europe

U.N.'s Standard International Trade Classifications (SITC), Revision III

Codes and Commodity Definitions at the 1-Digit Level

0—Food and live animals	5—Chemicals and related products, n.e.s.
1—Beverages and tobacco	6—Manufactured goods classified by material
2—Crude materials, inedible, excluding fuels	7—Machinery and transport equipment
3—Mineral fuels, lubricants and related materials	8—Miscellaneous manufactured articles
4—Animal, vegetable oil, fats and waxes	9—Goods not classified by kind

Codes and Commodity Definitions at the 2-Digit Level

00—Live animals other than animals of SITC 03	58—Plastics in nonprimary forms
01—Meat and meat preparations	59—Chemical materials and products, n.e.s.
02—Dairy products and birds' eggs	61—Leather and leather manufactures, and dressed furskins
03—Fish (excpt marine mammal) crustaceans, etc.	62—Rubber manufactures, n.e.s.
04—Cereals and cereal preparations	63—Cork and wood manufactures other than furniture
05—Vegetables and fruit	64—Paper, paperboard and articles thereof
06—Sugars, sugar preparations & honey	65—Textile yarn, fabrics, made-up articles, n.e.s.
07—Coffee, tea, cocoa, spices & manufactures thereof	66—Nonmetallic mineral manufactures, n.e.s.
08—Feeding stuff for animals not incl unmilled cereal	67—Iron and steel
09—Miscellaneous edible products & preparations	68—Nonferrous metals
11—Beverages	69—Manufactures of metals, n.e.s.
12—Tobacco and tobacco manufactures	71—Power generating machinery and equipment
21—Hides, skins and furskins, raw	72—Machinery specialized for particular industries
22—Oil seeds and oleaginous fruits	73—Metalworking machinery
23—Crude rubber (including synthetic & reclaimed)	74—General industrial machinery & equipment, n.e.s. & parts
24—Cork and wood	75—Office machines and automatic data processing machines
25—Pulp and waste paper	76—Telecom & sound record & reproduce appliance & equip.
26—Textile fibers & their wastes (exc wool tops etc)	77—Electrical machinery, apparatus & appliances, n.e.s.
27—Crude fertilizers (not SITC 56) & crude minerals (exc coal, petroleum)	78—Road vehicles (including air-cushion vehicles)
28—Metalliferous ores and metal scrap	79—Other Transport equipment
29—Crude animal and vegetable materials, n.e.s.	81—Prefab buildings; sanitary, plumbing fixtures, etc.
32—Coal, coke and briquettes	82—Furniture & parts; bedding, mattresses, etc.
33—Petroleum, petroleum products & related materials	83—Travel goods, handbags and similar containers
34—Gas, natural and manufactured	84—Articles of apparel and clothing accessories
35—Electrical current	85—Footwear
41—Animal oils and fats	87—Professional scientific & control instruments & apparatus, n.e.s.
42—Fixed veg. fats & oils crude, refined, fractionate	88—Photo equipment & optical goods n.e.s.; watches & clocks
43—Animal and vegetable fats, oils, and waxes	89—Miscellaneous manufactured articles, nes
51—Organic chemicals	91—Postal packages not classified according to kind
52—Inorganic chemicals	93—Special transactions & commodities not classified by kind
53—Dyeing, tanning and coloring materials	95—Coin including gold; proof and presentation sets
54—Medicinal and pharmaceutical products	96—Coin (other than gold coin) not being legal tender
55—Essential oils, perfumes, soaps	97—Gold, nonmonetary (excluding ores & concentrates)
56—Fertilizers (except crude of SITC 272)	98—Estimate of low valued import transactions
57—Plastics in primary forms	99—Low value shipments; various shipments not identified by kind

exc = except

n.e.s. = not elsewhere specified

TRADE COMPONENTS AND RELATED SITC CODES

SITC CODE	TABLE DESCRIPTIONS
Primary Products	
0	Food and Live Animals
1	Beverages and Tobacco
2	Crude Materials, Excluding Fuels
3	Mineral Fuels, etc.
4	Animal, Vegetable Oil, Fat
Manufactured Goods	
5	Chemicals
6	Basic Manufactures
7	Machines, Transport Equipment
8	Miscellaneous Manufactured Goods
Capital and Consumer Goods	
7	Machines, Transport Equipment
8	Miscellaneous Manufactured Goods
Computer and Telecom Equipment	
75	Office machines and automatic data processing machines
76	Telecommunications & sound recording & reproduction appliances & equipment
Apparel	
84	Articles of apparel and clothing accessories
Other Goods *	
9	Goods not Classified by Kind

* Includes special transactions, unclassified mail, gold coin , presentation coin sets, non-gold coin, non-monetary gold (excluding ores & concentrates), low value shipments.
